

**ProTecSoft eDispatch**

This is a Powerful, Reliable, Cost-effective and easy to use software designed for the **small/medium** fleet owned business. The business process for the software is an outcome of some of the North American transportation industry leader s extensive experience. This industry proven software is designed in windows environment with rich user interface designed specifically to adopt low-skill

**Main Functional Features**

Business process of the software is divided into four different sections: Reference, Transaction, Reporting and Tools.

**Reference Section:** This section is basically for storing information of records which are used in other two sections. This section consists of -

- o **Customer Records and Address Book:** Maintains complete customer records with details like addresses, contact, names, notes etc.
- o **Employee Records:** Maintains complete employees record with reminders for Driver License renewal and other important dates.
- o **Vehicle Records:** This feature keeps records on all your vehicles and provide the features for keeping track of your vehicle costs.
- o **Additional Costs:** This features allows the user to set PST , GST and other costs like waiting charge , fuel charge etc , either in percentage value or a lump sum value.

**Transaction Section:** This is the section where the user conducts the day to day activity. This section consists of -

- o **Bill Of Lading module:** The Bill Of Lading module is the starting point for all the process. It allows you to quickly and easily create truck loads, assign drivers, assign shipper/consignee details and additional costs.
- o **Invoice Module:** The Invoice module allows you to select all the un-invoiced bill of lading transactions either for a shipper or a consignee at any defined period of time.

**Reports Section:** This is the most important and highlighted feature of our product necessary to all levels of management in any company. The extensive scalable and runtime design feature enables the product to adopt into any user reporting requirements.

The product comes with following built-in reports -

- o Bill of Lading transactions
- o Invoices
- o Sales reports on daily, weekly and monthly basis.
- o GST/PST analysis reports for a defined period.
- o Invoice aging reports

**Tools Section:** In this section user can find helpful utility tools for enhancing the capability and usage of the package. The section covers -

- o **Training - by Animated Tutorial:** User can easily learn to use our eDispatch software by using animated tutorials which explains each module step by step
- o **Accounting Software Integration:** We provide services to enable the integration of eDispatch with accounting systems like Microsoft SBM, MYOB, Quicken, QuickBooks, Peachtree etc.

**Additional Features:**

- o **Database Access:** This product comes either as a single user version or a multi-user version. Pricing strategy of the product is based on the concurrent user license.
- o **Customer Support:** ProTecSoft offers state of art customer support for all their products with a reasonable price. For further information regarding the customer support management visit our website site [www.protecsoft.com/solutions.htm](http://www.protecsoft.com/solutions.htm)
